 - Developed RESTful APIs and optimized SQL queries, implemented pixel-perfect and responsive designs with HTML/SCSS, integrated third-party apps (Stripe, CorvusPay, Yoti, CKEditor, etc.) and developed React Native mobile apps.

Projects

- **Dealio | React Native**
 - Digital marketplace platform designed for buying and selling various items like houses, cars, and electronics. It features a user-friendly app where users can easily post and promote their ads. The app offers a simple process for creating ads, encouraging local transactions without the need for delivery.
- **Logical Contracts | React.JS, .NET, MSSQL**
 - Platform for creating and managing smart contracts. The app simplifies the process of drafting, executing, monitoring contracts and signatures, ensuring secure and transparent transactions.
- **RAS | React.JS, .NET, MySQL**
 - Offers recruitment and hiring solutions for the retail sector, focusing on optimizing candidate selection, enhancing efficiency, and reducing costs through data analysis and innovative technologies.
- **Managevio | React.JS, PHP Symfony, MySQL**
 - User-friendly project management tool that enhances team collaboration and productivity. It offers features for task organization, real-time communication and progress tracking, all designed to streamline workflows and help teams achieve their goals efficiently.
- **HireMe | React.JS, PHP Symfony, MySQL**
 - Web application designed to simplify job searching and hiring. It connects employers with skilled workers, aiming to create a secure and user-friendly platform that streamlines the process of finding jobs and workers in the modern digital age.
